

I find the traffic and weather information from XM more accurate than the local FM broadcasts. WTOP does a better job than the other FM stations that use the traffic and weather information broadcasted as a public service, but the timeliness is not near as good as I have experienced from the XM service. But, I do use both and will continue.

Also, Having ability to review other cities (Philly,PA, etc) information has been a great assist in my traveling to many locations throughout the U.S.

I recommend the traffic and weather information continue to be provided by all Radio Bands and services.

Sincerely, Michael Peck
